To Whom It May Concern

RE: GOLDLINK DEVELOPMENTS

This Office has worked with Goldlink Developments for a period of some 5 years as their Consulting Engineers. During this time we have prepared designs for approximately 10 projects ranging from dwelling additions through to Unit developments

As a typical example, in 2004 we provided engineering advice for the construction of three dwellings at Windsor Grove, Klemzig.

I have always found Terry Golding to have a very good understanding of the building industry both on a technical and a commercial level.

On the basis of the above I would have no hesitation in recommending Goldlink Developments as being a suitable candidate for increased insurance limits on their building projects.
